Open │ Closed panels │ Roundtables
Submission deadline: November 15, 2022

CALL FOR INDIVIDUAL PAPERS
Submission deadline: January 31, 2023

Conference Theme:
RELIGION AND TECHNOLOGIES

- The concepts and connotations of technology across various religions.

- Discussing how religions have viewed and treated technology historically and more recently.

- The relationship between religion as practice and theory, or religion and science, including their interactions, conflicts, or other types of interactions.

- Investigating esoteric, magical, or other religious practices as techniques.

- Reflecting the spread and practice of religion via technology.

- Understanding religion through the lens of concepts associated with social technologies, technological knowledge, etc.

- The use of technologies and techniques in religious studies. Studying religion in the digital age: advances in the digital humanities and beyond.
